Subject: Option for recall election

I do believe that if the people of this state or more importantly of this country are not happy with their elected government, there should be an option given enough numbers to allow for a new election to be called. This is particularly important federally as is the case now, but would also have been a great advantage with the last state government. We had to wait until they drained the coffers dry, knowing all the time that they were ruining our state. Lets move for changes in the law!
