Subject: Support for Recall Elections

Dear PM&C,

I wish to express my emphatic support for the proposal for establishing a system for recall elections in NSW. This is an appropriate reflection of our democratic rights to choose the leader, party and path that our state follows. When that leader or party continues to handicap the aspirations of the majority, there needs to be a mechanism for revalidation of its merits.

The system should be rort-proof and involve controls that ensure a noisy minority cannot destabilise the broader consensus.

Regards, Konrad
