### 1.1 Causes and contributing factors

This year marks the 30th anniversary of the publication of the first report by the IPCC (the Intergovernmental Panel on Climate Change). Already in their first report, the experts warned of more frequent bush fires and bush fires of greater severity. Since this first report, the IPCC has published a further comprehensive assessment reports, repeating the same warnings. For 30 years our government has been ignoring expert advice and ignoring the

warnings. We don't expect our elected leaders to be experts in every field, but we do expect them to listen to the advice of experts. They have failed in this duty.
