**Your story**

I think that our bush land trees should be protected and individuals should not have the right to cut down any trees at their own discretion if they live within 100m of bushland or parks. This code will only serve to decimate our neighbourhood trees. People in my area want to cut down every tree on their block. The council is pro developer (apart from the hardworking tree assessors). If this code passes then we will be saying good buy to our beautiful leafy Sydney suburbs. Additionally, trees created canopy that cools our suburbs.
