my issue is with the pathetic traffic network and I urge you to consider SUBSTANTIALLY improving the princes hwy in your review of the many many things that went wrong in the weeks and months of the bushfires..

let me tell you about my 2019 christmas holiday...o. I was down visiting my parents for Christmas & we were staying at our home in [REDACTED] fire was coming at us from the south near sussex... the forecast predicted a south westerly and even though we were outside of the orange zone that RFS said might hit us, but so were many places before us that got burmed.... Our plan was to get to family in Sutherland to escape the fire area. Jervis bay road was our only way out and our plan was to leave but it became pretty clear that jervis bay road was a no go zone because google was showing that traffic was backed kilometres. The intersection prevented us from following our survival plan. we had to stay put. We weren't prepared to stay and defend because it wasnt part of our plan,,,,,. This caused HUGE amounts of anxiety in our household,,, Having non stop ability to get onto the highway from jervis bay road would have allowed us all to get out on that day. the subpar highway and especially the

poor intersections onto it couldve killed us. the highway needs to be duplicated and the intersections from the holiday hot spots to the highway need VAST improving.
