**1.1 Causes and contributing factors**

Build up of fuel loads, particularly in residential areas close to reserves and bushland.  
Fuel in the form of green waste around residential properties became another source of fire hazard over the summer period. Currently residents are discouraged from clearing their properties and disposing at council tips because of the disproportionate charge placed on trailer loads of green waste. Instead it gets dumped in bushland or left on properties, just waiting for the next ember to ignite it.  
I recently sent a petition with 1000 local signatures to Shoalhaven City Council, requesting the tip fee for green waste to be permanently removed to encourage a safer residential environment, but at their last meeting council voted to retain the

current charges. If we are really serious about reducing dangerous fuel loads to prevent another catastrophe like the one we have just experienced, it would seem quite reasonable for council to waive green tipping fees for local residents permanently. I have attached some relevant documents. Thank you.

Letter: Greetings,

Here in the Shoalhaven LGA we, like many other regions, have experienced devastation and grief from the recent bushfires.

As residents trying to maintain our properties and create safe fire zones around dwellings we still have to contend with no green waste collection in the Shoalhaven, and having to pay to take green waste to council tips.

Residents here have simply too much green waste and litter to recycle and compost, given the vast treed areas in our towns.

We ask Shoalhaven council to allow residents to deposit green waste at council tips at no cost all year round. This would greatly assist keeping our towns cleaner and safer in the years to come. Thanks for your consideration.

## **Submission to Shoalhaven City Council re Green Waste Report**

I apologise for not being able to attend the Strategy and Assets meeting, but I have included here a brief summary of what I would like discussed about the issue of green waste.

It is unfair to charge residents to dispose of green waste at council depots for several reasons:

- Due to our heavily treed environment here in the Shoalhaven we simply have too much green waste to be able to compost or mulch.
- Some of this comes from residential gardens but much comes from reserves, bushland and forests that bound properties.
- It is currently difficult to dispose of excess green waste, especially when it is generated from outside properties.
- Much green waste goes into household red general waste bins and to landfill.

Given the recent bushfire catastrophe we need to be encouraging residents to keep their properties free of possible fuel.

- Free green waste tipping after the recent fires was a great help, but it doesn't go far enough as fuel will build up quickly.
- Many people refuse to pay a fee for disposal and just dump green waste in the bush, exacerbating the problem.
- Instituting free green waste disposal will encourage residents to dispose of their waste responsibly.
- Green waste disposal costs incurred by council is a matter to be taken up with the relevant government department.

It is clearly an issue that requires a considered response, so I, along with the 1000 local signatories on the petition, am hopeful that council will seriously approach the matter and actively search for a way to be able to implement a measure to satisfy its residents.

I thank you for your time.

Yours sincerely,

Greg Best
