

Title	Mr
First name	Robert
Last name	Walker
I am making this submission as	Resident
Submission type	Personal
Organisation making the submission (if applicable)	
Your position in the organisation (if applicable)	
Consent to make submission public	Public
Your story	<p>We evacuated to the Moruya evacuation Center to an unorganised and violent event. No police to maintain order at night with alcohol and drugs being used openly with hysteria with children and adults crying out I don't want to die are we going to burn to death</p> <p>Ok so this happened giving the organisers ample time to coordinate the Center in a much more payed out plan personally burning to death was looking like a better option I am sorry I forgot to mention the theft of people's personal possessions and food. Planing for an emergency has obviously been over looked by Council. Please look into planned disaster as there are many forms of disaster that can strike at any moment without notice we the public are entitled to a better disaster plan. Be prepared</p>
1.1 Causes and contributing factors	Lack of planning

1.2 Preparation and planning

Council needs to be removed from the clearing or burning of bush land give the RFS controlled in making informed and the final say in burn offs

1.3 Response to bushfires

We need to own our own water bombers in each state when not in use lease them out to other country's we are smarter than leasing from other countries for gods sake Australians need to take care of our own we are the largest bushfire country in the world.

1.4 Any other matters

People have shown their generosity day way of donations of many types.
We need to establish a central point by means of one agency to take all donations and make sure they are distributed in a manner so all funds raised become available to those who need them and not tied up for future funds . No fat salary's nor admin fees just honest charity.
Many people have approached me personally making cash donations to those who needed it because they do not trust charity to give it out that to me says the system is broken
This to me is probably the thing that has been highlighted the most after the fires. I don't have the answers but I believe there are better methods that could be developed.
