Your story	<p>The NSW "Fires near me "app needs to be a national fire app. We are close to NSW -Victorian border so looking on the NSW app the situation didn't look horrendous at times but then when you then bring up the Victorian Fires app the fires were catastrophic on the Victorian side of the NSW-Victorian border.We need an overlap of state fire apps (300km?) or even better a national " Fires near me " app</p> <p>Also the ACT Fire app came into action when the Namadgi National Park (Clear Range and Bumbalong Rd) was burning. The ACT app was quite useful as the dark red middle circle indicated currently burning or already burnt areas, then around that was a paler red area indicating where they estimate the fire would spread to over the next 24 hours. And finally around all of that was a coloured indication for intended ember strike. This was very useful information and would have been helpful on the NSW and Victorian fire apps.</p>

**1.1 Causes and
contributing factors**

**1.2 Preparation and
planning**

**1.3 Response to
bushfires**

1.4 Any other matters
