Your story

We live at Cudmirrah which has approx 400 houses in the Cudmirrah and Barrera area and is in the post code region of 2540
Our villages are ringed by Conjola National Park and the Ocean
My concern is the CURRENT amount of fuel that is on the floor with in The National Park and Crown Land areas around our area . Before the current Fires this year the last time our area has had fire in it is the 1999 -2000 Christmas fires which were horrific .
Our community was cut off for 7 days with out food or electricity - we actual had food delivered by sea . This season we were very lucky due in part to Arial water booming and a strong Southerly wind shift that blew the fires away from our Villages.
Our area needs to have a fuel reduction process happening as if we have another hot n dry summer I believe our villages and human life wont survive
