

Title	Ms
First name	Tiffanie
Last name	Glagovs
<hr/>	
I am making this submission as	General public
Submission type	Personal
Organisation making the submission (if applicable)	
Your position in the organisation (if applicable)	
Consent to make submission public	Public
Your story	<p>For the past 5 years I have been attempting to get answers about heavy aerial spraying (UADS - Unmanned Aerial Drone Spraying) conducted in NSW that I regularly sighted and took footage of. I contacted every Minister and CEO that I could think of but no one could/would give me answers and kept saying it was plane condensation. I now know it is a process called 'Cloudseed Testing' and that the NSW Government funded this testing in 1994. This testing remains heavy in our local area (Nambucca Valley) to this day and as you will see from my footage is very close to tree and rooftop height. I believe this heavy grid spraying that I have seen ALL along the NSW Coastline is a main cause of our bushfires by drying out our trees and vegetation with the chemicals being sprayed. I would like to know who is directly responsible for UADS and exactly what substances they are spraying our communities, flora and fauna with. It is not only a concern for future bushfires but also the health of all Australians.</p>

I believe the other main reason our bushfire and drought is so severe (and continues to be exacerbated) is by our complete over-dependence and excessive use of glyphosate based products in our agriculture and how we spray our thousands of square kilometres of food and crops with this now proven poison. Glyphosate dries the life out of everything it comes in contact with turning our flora into fire accelerant and our waterways into....poison. The amount of countries that are now banning this poison globally grows daily as Monsanto/Bayer are proven in court to have lied about it's cancer causing properties. But it remains Australia's most used herbicide/pesticide.

1.1 Causes and contributing factors

1. UADS - Unmanned Aerial Drone Spraying or 'Cloudseeding Testing' (PLEASE review all footage on my twitter site @bowradise under 'Pollie Police' as it is too large to put on here)

2. Glyphosate based products and how we dry out our land and poison our waterways with our extensive use of this now proven poison in our agricultural practice all over Australia

1.2 Preparation and planning

Although grateful for their help and we really had no choice with the firestorm we were facing at the time, the 8 million litres of extinguishing agent the Americans dropped on us from their VLAT plane concerns me greatly. And I think we need to stop this in future planning of our fighting fires. Exactly what chemical substances were in this fire retardant? Please note: Williamtown cancer incident.

1.3 Response to bushfires

I think we should be proud of our response to the firestorm as a whole. Thank God for our volunteer firefighters and the community spirit that backs them.

1.4 Any other matters

I have too much video footage to upload so would like to submit officially that you please examine all of my UADS/cloudseeding footage on my twitter site (@bowradise 'Pollie Police') as part of my submission. I am so very grateful to pass this onto you now for proper investigation and answers, so look forward to hearing the results of your inquiry. Thank you Tiffanie
