Your story Flash flooding is atrocious in East Lismore. The

storm water drains are NEVER maintained and have never been upgraded to deal with the build up of homes and businesses in the area. The storm water drains not only require maintaining but dug deeper with a 'walking path' over the top and grates at ends for safety. The drain would be able to handle a lot more water and be diverted from homes and businesses in the East Lismore area. I made a submission 12 months ago to clean the drains as this is an ongoing issue that needs URGENT rectification. Flash flooding occurs more often than not.

Terms of Reference (optional)

The Inquiry welcomes submissions that address the particular matters identified in its [Terms of Reference](#)

1.1 Causes and contributing factors	Insufficient storm water drainage
1.2 Preparation and planning	We will be purchasing a truck to avoid further floods but if there is a freak heavy downpour and the drains flood there is not much that can be done in that situation as the water rises way too quickly to move equipment/tools/items/office furniture ect.
1.3 Response to floods	We have lost a lot in the last 3 'floods'. We can not keep doing this.
1.4 Transition from incident response to recovery	Slow and depressing!!
1.5 Recovery from floods	Slow and depressing!!
