---

To whom it may concern,

While the ses were being a bunch of cowards in the dark at 4/5am my partner her sister and sister law were paddling around in the dark in a tinnie and two paddles rescuing people the ses refused to rescue. These 3 have zero training and risked lives to save people while the ses were twiddling thumbs. One man was handicaped with water up to his neck.

If yiu are apart of emergency services and cant do what your trained to do while two nurses and a support worker go about saving lives in a tinnie then they need to take a hard look at themselves.

Provide funds tontrain these people and have more boats.

Also provide adequate warnings so people dont drown in thier beds aalsep.

Kind Regards
