Hi

I would like to request an investigation into the causes of the current weather and flood patterns.

Anyone who has been alive for more than a few decades knows that this is not a natural but a man-made event.

My community has been observing chem trails for many years and this seems to have gone to a whole new level.

I would like to include in this inquiry the connections between the Australian government and the World Economic Forum and the plan to build smart, resilient cities where people are driven out of regional areas with events like this.

I sincerely hope that someone awake is reading this and has the heart to reply. The government is elected by the people for the people and not by the corporations for the corporations.... Or is it?????
