To the Independent Inquiry:

My first thoughts that should be addressed is the Cause of the floods.

Geoengineering and Weather Seeding Programs should definitely be discussed as a cause for this unprecedented weather patterns. There has been sightings of aircrafts undertaking spraying trails and clear weather analysis from BOM Radar loops as well as rain water testing for chemicals which identify the occurrence of such practices.

Secondly, the lack of government support and response. Over \$50 Million have been spent in Ukraine however, there has been very little help from the government and the Red Cross has not provided the funds raised at their MSN charity event.

I trust these 2 points will be part of discussion and investigation in your inquiry and I look forward in the deliberations and findings.

Yours sincerely,
