Dear Flood Enquiry,

Whatever the cause, there have been too many floods here. They are devastating. Towns have been started near rivers, where it floods, against the advice of indigenous know how.

The only solution: move CBDs to higher ground, instead of keeping on making the same mistake. That will cost a great deal of money and effort, but it is better than this, no matter how high levies are. NSW State must help in this. The problem is not of our making. The council has already moved to Goonelabah years ago.

Kind Regards,

Long-time local resident
