To Whom it may concern -

We write to the NSW Govt to seek some form of compensation as to why more wasn't done in preparation of these catastrophic rain events in Lismore & in QLD.

It was common knowledge Australia would endure extreme weather events this summer. It was all over mainstream media we learnt about the *La Nina* **months & months ago**

(*meaning:* During a La Nina event, **the changes in Pacific Ocean temperatures affect the patterns of tropical rainfall from Indonesia to the west coast of South America.** These changes in tropical rainfall patterns affect weather patterns throughout the world.)

The Govt knowing full well these rain events were coming with little been done to prevent people from losing everything & most importantly, lives. We believe over 450 deaths were accounted for in Nth NSW & QLD due to these catastrophic floods. Mainstream media never reported accurately on the death toll, lack of true facts, the cover up is shameful.

We sincerely hope a full inquiry will be conducted ASAP so the stricken people from these regions know the truth & that the Govt failings will be visible to all concerned. They need their homes rebuilt & their spirits enlightened as soon as possible.

We trust this email will be read with compassion & action will be taken promptly so these people can get on with their lives.

PS. The drainage in Lismore **MUST** be reevaluated prior any rebuilding.

Kind regards,
