As you are doing a so called enquiry, could you be kind enough to include all information on the weather modification that's happening , the majority of Australian people are now waking up to what's going on and that number will only get larger , unfortunately you can't stop the awakening of people the numbers will only grow, granted some will be sheep forever but the media ratings alone should tell you the tide is turning .

So if you want to save any sort of credibility, something which your loosing by the second , then I suggest you report on the weather weapons being used and then you may, just may get some people back on side . Don't blame climate change when it's mad made modification, be on the right side of history , the will of the people is stronger.

Once people work it out , who's gonna pay tax? Who's gonna pay rates , who's gonna pay GST , think about it , government needs us much more than we need you, you can't put us all in jail , you can censor everything . We are the 99%

Kind regards
