---

Dear Flood Inquiry,

### **Options to restructure Lismore and also to help solve the housing crisis...**

- 1 Government buys flood prone houses for market price and rents as public housing, on the understanding that they flood every few years, with appropriate water resistant furnishing and renovation.
- 2 Government subsidizes the cost of relocating flooded houses to higher ground...possibly to surrounding hilltop villages.
- 3 Storage facilities built to accommodate the town's furniture during future floods.
- 4 Shops fitted with water-tight doors and windows.

These may be relatively cost effective.

Yours sincerely,

Kyogle
