Subject: Cloud seeding can cause significant flooding
Date: Friday, 6 May 2022 11:25:50 AM

Sent from my iPhone. Hello Ms O’Kane and Mr Fuller , there is clear evidence that the RAAF has in the past , conducted cloud seeding operations on behalf of the N.S.W. Government . Have you investigated as to whether cloud seeding may have been programmed just prior to the recent and unprecedented devastating flooding event over Northern NSW and coastal Queensland . You would probably be aware that the Queensland Government commenced their own cloud seeding program in 2009 . I believe that during the recent flood , Lismore experienced a record flood height which was two metres above the previous known record height , one may be left thinking that something untoward has occurred here in order to unleash such a deluge on this town ? Many thanks
