Lismore was worse hit
Sorry my violent ex put a malware on my email
Police do nothing and neither has the state premier as my ex corruptly work for the ex premier stitching up labour using icac to shore up liberal power and smear labour
I reported the 120 million misappropriation by liberal Baird use of the icac social justice model and was targeted and my violent ex protected as they used their law enforcement role to protect liberal corruption

To the head of the review Mary the liberal premier but been cruel and kicked us when down with his coalition who's done nothing(Insurance aren't paying what we're above flood homes the gov told us we were safe and we were I have sewerage all over inside and out my home and no power and it's essential and Urgent.

You have a social legal moral responsibility and a duty of care and a duty to act under employment laws and job competency and yet this coalition gov corp is never responsible never accountable and people are dying suffering and you have destroyed our assets homes and aren't rebuilding but denying urgent buyouts and starving us of funds to rebuild and you have been weaponising protecting the insurance groups who haven't obeyed the laws and have created sham docs and haven't paid people above flood. Its outrageous. It's raining so much it will probably flood again in lismore. And nothings been done nothings been paid and all homes & people are suffering in danger.

Please confirm you will buy out my home as it's unsafe uninhabitable and no one should be living there and it's this essential safety state and federal obligation to offer buyouts like

QLD has that Was worse hit yet the local corruption by council and resilience having council on it and the federal nationals / lib Mp that has marketed they care but don't walk the talk.

We are in damaged uninhabitable homes because of their Negligance and roles dereliction of duty because they want to keep a tax base there.

Please Confirm today as it's unconscionable and make me an offer to the a fair mark price before the floods. I have been told the council knew it would go higher and never told us and mislead and deceived me and now I have lost my home and everything because I obeyed the planning laws that hide the truth. It's 10 degree at night and your ignoring urgent rights to safety and displaced people from the coalitions Negligance and this needs to be before the new federal icac the systemic corruption and taking advantage of natural disaster victims . New pm the coalition knew Kevin hogan about the last federal misappropriation of 84 million and the pumps not working. You need to buy out please and stop the suffering you are causing me and us all.

New PM Albanese as your 1st urgent executive order safety is a priority (labour done it liberal nationals are derelict of duty and protecting the corruption and insurance agencies). But out lismore homes- it's urgent and the review is fraught as littered with the councillors and people who are part of the problems with the existing gov corp. No heart no soul and all marketing not proper fit essential safety results, it's distressing how they stone wall financially sanction us. There are so many disabled women dv victims and good hard ozzy workers in south lismore and we are being denied what QLD labour has done and it shows the last Pm was intentionally punishing the state Labor elect while the coalition hogan did sweet Nothihg except market lies like his mate the ex PM Morrison

Stop sitting on your hands people are using cardboard to line houses and it's been raining again for months

Buy out me and us today it's not rocket science and the right thing to do

Yours sincerely

Flood submission buy out lismore my home it's unsafe 1/500 is the new norm and Mary O Kane as discussed and premier of NSW Dominique P as a duty of care please honour your duty to act and do a buy out scheme as QLD has already set the best practice benchmark and Lismore is worse. This is urgent we need money and safety now as it's caused homelessness poverty and displacement and I was legally above flood by laws and the insurance groups you haven't made pay who were meant to obey this government ordinances of planning and they have changed the goal posts and broken the contracts signed initially and 20k for a 650k damage bill rebuilt of my sewer soaked uninhabitable house is deadly and another safety disaster waiting to happen. Please act with integrity ethics and good speed do not give it to the corrupt Lismore council that's 150k in debt who only good at cooking books and negligence and fleecing of flood funds to their affluent mate keeper program. Please have grace and class as you need to move Lismore sth and pay fairly me and others who obeyed the laws but have been betrayed and not protected by fair leadership locally. Strategically on a disaster recovery plan it is urgent as flooding will keep happening this year and we need money to buy and start again not in a disaster zone that will only cause more damage and death if you allow the area to stay and not buy out us. I don't get it why has QLD done it so fast and why haven't you? It's urgent and I please ask you have ethics and grace and buy me and us out today and stop the delays and leaving it to the local council who is part of the problem not the solution. Please look after your people community with love and care and be positive change love healthy leaders as to date the mismanagement is unconscionable and you as leaders tasked need to take account and protect the people and pay us out move people who want to. I would never have brought if I had of known and lost everything please act with heart today. Yours sincerely,

at

. As my masters teacher in employment law says at UTS the only thing permanent is change and if people die you can go to jail. Please live the principal of authentic public interest as QLD has already and NSW needs to copy the model as its essential safety
