Subject: landslip / erosion of creek bank threatening access to two properties involved in primary production/ main arm road
Date: Friday, 10 June 2022 8:41:12 AM

To Whom It May Concern,

During recent weather event in February 2022 our creek banks were impacted like we have never seen in over 40 years.

The main landslip in the creek bank, bringing down a row of established trees , has compromised our access/ driveway to both our farm and our neighbour's. This driveway is functional still for light traffic.

Both these farms are involved in Primary Production (beef cattle).

Our neighbour needs to transport his cows out soon but we are not sure the driveway can sustain the weight of this truck- estimated to be 9 tons when loaded.

We are worried about how this area will cope with future floods.

We have already replaced our boundary fences affected by the flooding at a cost of \$15,000.

Are we eligible for assistance ?

We are and at and our neighbour is
 of .

Thanks for your attention.
