This is my third submission to this inquiry.

The indigenous word for Lismore means swamp. With this in mind, I'd suggest a complete revegetation to recreate The Big Scrub in the whole area that was flooded in 2022.

A middle ground might be a golf course, parklands and playgrounds along with a sizeable portion being returned to Big Scrub.

In addition, those who own houses that were flooded should receive \$500,000 for their land buy back and relocation compensation. The Liberal government have not acted soon enough to mitigate global warming damage and despair.

I see a vision for Lismore that turns it into a highly sought after area, offering a wonderful lifestyle. We could even have an elevated zero emissions train from Casino to Murwillumbah, above flood and built to accommodate anticipated sea level rise within a 200 year time frame.

God bless. Namaste.

Kind regards,
