Hi there,

My email is concerning the 2022 Floods Inquiry by the NSW Upper House.

In particular the Pitt Town Flood Access & Emergency Route and the resulting fiasco.

If urgent remedies are not taken to substantially upgrade all roads and subsequent evacuation routes, people will die.

This may not even happen during the next flood.

In fact it could happen today, tomorrow or anytime, as many of our roads remain in a hugely damaged state.

You have allowed a developer to vastly increase the population of a small town. Sadly you've failed thus far to deliver the appropriate infrastructure.

Someone will die very soon because of this, I'm certain of it.

A similar or even larger flood could lead to mass casualties, good luck being responsible for that.

Fix it.

Thanks
