1.3 Response to floods SES members are required to use beacon to access job information. The service provides iPads but these are outdated, slow and require mobile reception to operate. beacon is designed for those working in an IMT, not in the field. There is a field beacon app designed for field work, but it is harder to use than the beacon website. Most members use their personal phones to access beacon. MDT installed in the vehicles would greatly improve our response to storm and flood events.

1.6 Any other matters I believe the NSW SES would benefit from
