Your story Re:levee off Walsh's Creek/south of Tatham Lagoon Bridge on the Richmond River. Flood mitigation works was carried out quite a few years ago at this particular site which did prove very efficient in saving livestock and plant etc in a major rain event. Our property at Frame Road, Codrington benefited greatly as did several neighbours on the eastern side of the

levee,affording additional time to prepare for a major flood event.In recent times the levee has fallen into disrepair and allows water to inundate property much earlier than practical.

It would be both beneficial and proactive along with our neighbour ,where the levee is situated ,to inspect and get a professional assessment of the situation as the neighbour is unsure as to the benefits or otherwise of the situation.As neighbours living below the structure we would benefit significantly in a major flood event.

We would really appreciate your inspection of the site and liase with both the owner of the property where the levee is ,and myself as the neighbouring farmer on Lots [redacted] and [redacted],and other adjacent landholders in the area.
