Share your experience or tell your story

Your story	It wasn't the rainfall or local flooding that was our concern when we had these terrible events. It was when the Warragamba Dam was released or allowed to spill over that we were affected by rising flood water. If they hadn't released the water at that time the local flood waters would have had time to recede, and in doing so major flooding would have been avoided. So it's a
-------------------	---

common-sense solution > hold back the water.
Also Raising the dam gives us more water storage, it's such an obvious solution to fix two issues. If it doesn't stop the flooding we still have water storage for the dry years that are coming ahead.

Terms of Reference (optional)

The Inquiry welcomes submissions that address the particular matters identified in its [Terms of Reference](#)

1.6 Any other matters

Raise the dam>>> Greater water storage for Sydney, and reduces the risk of overflow for the lowlands.
