### Your story

Tweed Drainage Council represents the combined Private Drainage Boards tasked with maintaining drainage systems across the floodplains of Tweed in accordance with Section 202(1) of the Water Management Act 2000 (NSW).

The major flood event on 28 February and high rainfall over the past 7 months has highlighted the importance of functional drainage on the floodplains. Water is taking too long to drain from the land, increasing flood heights and duration, and causing devastating crop losses and damaged infrastructure.

Commissioner Professor Mary O’Kane AC  
Commissioner Michael Fuller APM

### **NSW Independent Flood Inquiry Submission**

Tweed Drainage Council represents the combined Private Drainage Boards (commonly referred to as “Drainage Unions”) tasked with maintaining drainage systems across the floodplains of Tweed Valley, namely:

- Condong Drainage Union
- Tygalgah Drainage Union
- Dulguigan Drainage Union
- Cudgera Drainage Union
- Lavender Drainage Union
- Terranora Drainage Union
- Kynnumboon Plains Drainage Union
- Murwillumbah Swamp Drainage Union
- Mooball/Crabbes Creek Swamp Drainage Union
- Durambah Swamp Drainage Union
- Black’s Drain Swamp Drainage Union
- Cudgen Drainage Union

Private Drainage Boards are statutory bodies assigned responsibilities under the *Water Management Act 2000 (NSW)* (“the Act”) to carry out drainage maintenance within their districts.

Section 202(1) of the Act sets out the functions of private drainage boards:

- (a) to prepare, review and implement a management program for its drainage district,**
- (b) to maintain in a state of efficiency the drainage works under its charge, and renew such drainage works if necessary,**

....

The major flood event on 28 February and high rainfall over the past 7 months has highlighted the importance of functional drainage on the floodplains. Water is taking too long to drain from the land, increasing flood heights and duration, and causing devastating crop losses and damaged infrastructure. After the major floods in 1974, State and Federal Governments invested substantial funds to improve drainage infrastructure; a similar response is required now.

The key issues relating to flood mitigation that the Drainage Unions have identified are outlined below.

Floodgate infrastructure needs to be improved. In cases where there is severe damage (e.g. Black's Drain in South Murwillumbah) this infrastructure should be redesigned rather than replaced like for like. Drainage Unions are also calling for winches to be installed on floodgates to enable manual operation. The ability to manually operate the floodgates is important to increase the rate of drainage when conditions allow it after flood events.

There are numerous drainage outlets that have become choke points in drainage systems across the floodplain due to poor maintenance below floodgates over several decades. This is particularly noticeable in the largest (and most important) drainage outlets. Maintenance of these outlets requires permission from several government bodies; delays and duck shoving is not uncommon when permission is sought. Tweed Shire Council administers flood mitigation works funded by NSW Government and it is important that there is adequate regular funding to carry it out.

Similarly, there are natural waterways downstream of drainage systems that are badly silted up causing land to remain inundated for extended periods and increasing flood heights. Stotts Channel, Cudgera Creek, and Cudgen Lake and Creek have severe siltation problems due to vegetation impediments. Unprecedented flooding in Cabarita in 2022 is due to the siltation of Cudgen Lake and Cudgen Creek that prevents water from draining from this catchment. The poor water quality of these waterways is testament to the degradation caused by siltation; where they once were tidal salt water they are now brackish and stale.

Tweed River is the main drain for the area. It also is badly silted up and has numerous large sand bars that divert water towards the riverbanks, increasing bank scouring and of course increasing the height and duration of flooding across the floodplain.

To gauge community sentiment for river dredging as a flood mitigation strategy, we started a petition on 1 April 2022 (using both paper and online petition formats; results are attached, including comments by petitioners). We collected 1534 signatures without any kind of promotional campaign; it was simply shared by the community. We would say this indicates strong community support for river dredging as a flood mitigation strategy. At the

Flood inquiry Town Hall meeting in Tumbulgum on 4 May 2022 numerous residents called for river dredging to reduce flooding impacts. The Drainage Unions also support river dredging for flood mitigation.

Upgrading drainage infrastructure and improving drainage efficiency to reduce the impact of floods across the floodplain is a vital aspect of flood mitigation. Other measures, such as levee walls, also play an important role in protecting certain assets but they simply divert water elsewhere. Those measures do not deal with the quantity of water that rain events bring. The most effective flood mitigation strategy is to:

- Reduce the amount of water flowing down to the floodplain (i.e. build a flood mitigation dam in the catchment(s) upstream); and
- Increase the capacity for water to drain to the ocean as effectively as possible, which means improving all drainage channels and dredging the river to move water downstream.

The Drainage Unions are seeking:

1. Funding from NSW Government to model the drainage systems on the floodplain, similar to that undertaken following the 1974 major flood. We ask for the river to be modelled to establish if removing the impediments in the river would reduce the drainage times, not just from towns and villages but also the prime agricultural land;
2. Funding from NSW Government to undertake the requested floodgate upgrades (specifically to install 24 winches in the locations identified by Drainage Unions);
3. The support of the relevant NSW Ministers to enable the removal of protected vegetation from man-made or highly modified drainage systems and waterways in recognition of the vital role this infrastructure plays in draining water from the floodplain and to protect the properties and livelihoods of residents.
4. Expansion of the eligibility criteria for Disaster Recovery Grants that are made available to primary producers so that Private Drainage Boards are also eligible to apply for these grants. Private Drainage Boards have responsibility under s202(1)(b) of the *Water Management Act 2000 (NSW)* to maintain the drainage systems in a state of efficiency yet are not eligible to apply for funding to enable them to carry out these duties.

We believe these issues are of great importance to our community and the recent flood events have truly highlighted how important it is for water to be able to drain from land as quickly and efficiently as possible.

We thank you for considering our submission.

Yours Faithfully,

Joanne Iva  
Acting Secretary  
**Tweed Drainage Council**

This petition of residents, landowners and business operators of Tweed Shire states:

- Tweed Valley has just experienced its second major flood in just five years
- Hundreds of homes were inundated and damaged
- Thousands of residents were affected by the devastation
- Local businesses suffered an estimated \$57 million in damages and lost trade
- Public infrastructure will take years to fully repair

**Dredging Tweed River would substantially increase its capacity to drain floodwaters off the land, protecting our community.**

**THIS PETITION IS TO STUDY THE COSTS AND BENEFITS OF DREDGING THE TWEED RIVER.**

Sign this petition if you agree that the Council must undertake a flood study that examines dredging as an option to reduce the impact of flooding on our community!

Principal Petitioner: Joanne Iva

This petition of residents, landowners and business operators of Tweed Shire states:

- Tweed Valley has just experienced its second major flood in just five years
- Hundreds of homes were inundated and damaged
- Thousands of residents were affected by the devastation
- Local businesses suffered an estimated \$57 million in damages and lost trade
- Public infrastructure will take years to fully repair

**Dredging Tweed River would substantially increase its capacity to drain floodwaters off the land, protecting our community.**

**THIS PETITION IS TO STUDY THE COSTS AND BENEFITS OF DREDGING THE TWEED RIVER.**

Sign this petition if you agree that the Council must undertake a flood study that examines dredging as an option to reduce the impact of flooding on our community!

- Public infrastructure will take years to fully repair

**Dredging Tweed River would substantially increase its capacity to drain floodwaters off the land, protecting our community.**

**THIS PETITION IS TO STUDY THE COSTS AND BENEFITS OF DREDGING THE TWEED RIVER.**

Sign this petition if you agree that the Council must undertake a flood study that examines dredging as an option to reduce the impact of flooding on our community!

Principal Petitioner: Joanne Iva

This petition of residents, landowners and business operators of Tweed Shire states:

- Tweed Valley has just experienced its second major flood in just five years
- Hundreds of homes were inundated and damaged
- Thousands of residents were affected by the devastation
- Local businesses suffered an estimated \$57 million in damages and lost trade
- Public infrastructure will take years to fully repair

**Dredging Tweed River would substantially increase its capacity to drain floodwaters off the land, protecting our community.**

**THIS PETITION IS TO STUDY THE COSTS AND BENEFITS OF DREDGING THE TWEED RIVER.**

Comment

"Flooding needs to be addressed. This is one of many issues."

"Because of no other reason but common sense.As long as it isn't a money pit for so called experts."

"Clearly this should help. Flood mitigation requires a number of measures but a green council probably

"This place floods way too easy"

"My friends have been devastated by the recent floods"

"I grew up in Murwillmbah, so i understand what floods are like in this area, and especially after floodin

"Enough us enough. It needs doing now no more Green interference."

"This is a must .enough is enough of this not happening"

"I had water in my house. I have lived in the area since 1979. Never would I have thought this would ha

"I lived in the Tweed for 30 years & it was a constant threat every year that the Tweed river would flood

"Because I live in flood zones to and this would impact on my family"

"I am impacted by these floods"

"My sister and her family were affected by the floods"

"I used to live there my parents and family live there and are impacted by this river it needs to be fixed'

"This impacts all of us in this area..we've had enough and this would help enormously"

"I'm sick of losing everything"

"My step kids live there"

"Floods continuously destroy my families livelihoods"

"I believe it is necessary for the river at it has built up so much silt and mud that we are becoming the fl

"Gail P Burns"

"My family live on the tweed and have been flooded twice in 5 years they've lost everything."

"It needs to be done."

"Because it seems the most logical thing to doThis situation has gradually been getting worse. The flood

"Because something has to be done and it's the most sensible thing to do"

"I lost my house & all my possessions in the flood of March 2022"

"This is needed to clear the silt build up.so the river flows better."

"All solutions must be put on the table and examined correctly.Dredging works as a solution in rivers all

"I've seen too much destruction in the last few weeks. We getting more rain than ever and the rivers ca

"We need any measure that may reduce flooding impact."

"I"

"So many people I know and businesses have been impacted severely"

"If not now when!!"

"If not now when!!"

"If not now when!!"

"As a Tweed resident we need this flood mitigation strategy urgently"

"Because I have family in the region. Janice👍✔"

"Im tired. I have better things to than clean mud .Simple."

"People I know personally have been impacted by flooding twice within 5 years. All mitigation efforts m

"I know the Tweed Valley well and the river needs to be looked after for all."

"I live on the tweed river"

"The flood water not getting away means my elderly parents are cut off for many days and it destroys t

"Too many people are losing their homes and their mental state. Very sad"

"This is important to stop future flooding"

"For the safety of my daughter and grandchildren and the people in South Murwillumbah that have the

"Sean Bulmer last time the river was dredged the last time the river was dredged near the mouth the ti

"It seems like a good idea considering our recent flood history."

"Something also needs to be done to mitigate droughts. No good allowing all the excess flood water go

"Dredging the river will reduce town flooding"

"My business was flooded. I believe the River floor has become so full of silt, debris, household items a

"I grew up living in River St & when I was young the river was dredged. As older children later after the  
"Amanda Sheridan"

"I'm a local & believe this to be true"

"O used to reside on the river."

"The the dredging of the Tweed River should never have been stopped. The amount of debris from 201

"...all options to help to mitigate major flooding should be considered"

"My dear friend lives in Murwillumbah & has been flooded out twice in 5 years"

"It's common sense to do it"

"My friends and family are under extreme hardship. Fix this! Fix the Climate!"

"Got to be done!!!"

"I believe that dredging the river would help against future flooding"

"It's a must"

"This needs to be sorted out!!!"

"It needs to be done, too many lives have been impacted"

"I believe that the river needs dredging!!"

"I live here and our community can't recover from flooding several times a year."

"This situation needs to be fixed"

"Because complicated problems have complicated solutions. A multi-pronged approach, by also looking

"It needs to happen!"

"I live in tumbulgum and each flood is worse than the last. I hate to think what the next one will be like"

"This is common sense"

"Stopping the govt cabal chem trails and weather manipulation would work better."

"I care"

"It's the logical thing to do. Floods will only get worse if not done."

"It needs to be investigated – and people in those electorates need to vote for candidates who accept t

"This needs to be done so people can live there lives without fear of flooding"

"The recent devastating Floods have caused so much pain for People and Animal life"

"I think it's a good idea to reduce flooding in flood effect areas."

g, needs dredging, im sure theres lots of more mud and anything else that floats inti the river,"

ood plan with The necessary dredging will help the river become cleaner and we may even see dolphins

l levels are continuing to rise, these last weather incidents covered almost the entire east coast."

nd rubbish due to the past floods since dredging finished. Dredging needs to occur immediately"

dredging stopped we use to play cricket in the middle of the river at low tide. I'm talking 40 years ago, t

7 and 2022 floods still on the river bed let alone the silt and excess of dirt on the river bed due to banks

re build up since then has grown considerably. It just makes so much sense to dredge it again, the bank

near the high school that broke causing the damage in my now area I live (James St) could be built up us

ing the material dredged. Please consider this, very important & just makes so much sense !!!!!!"
