Your story	<p>I refer to the 4corners program on the ABC about the recent and past floods. Mention was made about the 1 in 50 year occurrence. Is that a reference to the "dry" and "wet" weather flood? Did the Council's of the areas do any upgrades to change the storm water drainage to meet the water flows or consult with the authority? Is there any bigger drain pipes put in since?</p> <p>The experience was having open storm water drains eroding the land. This was due to bad road drainage too. Although the matter was referred to the Council which was passed on to the Water Board where each time their staff could not meet me.</p>
