Panel of Experts – Political Donations

Submitted by Nicola Bludau

Date: 17 September 2014
Regarding the donations reform, my suggestions are the following:
- Donations from mining companies should be prohibited. These donations have a negative impact on renewable energy development in Australia, because mining companies have so much more financial power.
- Follow all the ICAC recommendations to clean up lobbying.
- Donations disclosure should be immediate, when the donation is made and there should be a user friendly database for the public (key term search)

Kind regards,
Nicola Bludau
